How do you translate success?

ISACA® Certifications = Success

Are you working in IS audit, security and/or governance and want to advance in your career? Get recognized as an expert in your profession by becoming a Certified Information Systems Auditor™ (CISA®), Certified Information Security Manager® (CISM®), or Certified in the Governance of Enterprise IT® (CGEIT®).

ISACA certifications are globally accepted and recognized. They combine the achievement of passing an exam with credit for your work and educational experience. With an ISACA certification, you will move ahead in your career and gain credibility as you prove to employers that you have what it takes to add value to their enterprise.

Being a CISA®, CISM® and/or CGEIT® :

- Counts in the hiring process
- Boosts your earning potential
- Enhances your credibility and recognition

Recruitment experts, in a December 2008 article titled “Top Certifications for Industry Pros,” noted that a CISA, CISM and/or CGEIT certification will help keep you afloat during the current uncertainty facing business.

With an ISACA certification, you are prepared for the future.

“The future of IS auditing is in the hands of its practitioners. Proven experience and knowledge are essential, but certification is also crucial to meeting the demands of the future, which also necessitates continuous education. Maintaining an ISACA certification helps provide practitioners with the ability to meet the demands of today and prepare for the future.”

—Richard Brisebois, CISA, Office of the Auditor General of Canada, Canada

Certified Information Security Manager

CISM certification is for the individual who manages, designs, oversees and assesses an enterprise's information security program. More than 11,000 individuals from more than 80 countries have earned the CISM designation.

Stand Out From Other IT Security Professionals.

The demand for skilled information security professionals is on the rise. Make sure you have a competitive advantage.

CISM demonstrates your management experience in information security.

If you have three years or more of experience managing the information security function of an enterprise or performing related duties, you will find the CISM designation tailored to your knowledge and skills.

Increase Your Earning Potential With CISM.

According to Foote Partners' 2008 fall survey of more than 22,000 IT professionals, covering more than 170 certifications, the CISM certification ranked as a 'Top Five' performer. Growth in pay for the CISM over the past 12 months is nearly four times that of other noted security certifications.

Earning the CISM certification puts you in an elite peer network and distinguishes you as a qualified information security professional.

"The CISM designation signifies integrity, responsibility, knowledge and experience...all of which I expect from a prospective employee."

—William C. Boni, CISM, Corporate Vice President,
Motorola, USA

ISO/IEC 17024

Certified in the Governance of Enterprise IT

ISACA's certification for individuals engaged in the governance of IT is intended to recognize a wide range of professionals for their knowledge and application of IT governance principles and practices.

You Have the Knowledge and Expertise in the Governance of IT. Now, Enhance Your Credibility and Influence.

Savvy companies know that IT governance is a key component of enterprise governance. It can create competitive advantage through operational efficiencies, better business information and time-to-market.

But you already know this! You have the knowledge and expertise to add value to your enterprise. Earn your CGEIT and earn influence at the executive level.

Enterprise-based IT management and IT governance is the second most important business issue facing IT managers and executives in the next 12-18 months, according to ISACA's *2008 Top Technologies Survey*.

Whether you are an experienced IT manager or a business manager aspiring to reach the pinnacle of your profession, CGEIT certification can enhance your professional standing and provide the recognition you have earned for your IT governance expertise.

"The CGEIT qualification provides me with the credibility to discuss critical issues like governance and strategic alignment based on my recognized professional knowledge, skills and business experience."

—Vernon R. Poole, CGEIT, CISM,
Head of Business Consultancy,
Sapphire Technologies Ltd., UK

"The CGEIT certification gives credibility to my knowledge of governance and management to peers as well as customers—it creates an umbrella for all of the other certifications I currently hold."

—John P. Pironti, CGEIT, CISA, CISM,
President, IP Architects, LLC, USA

For more information, visit www.isaca.org/cgeit.

Certified Information Systems Auditor

Since 1978, more than 70,000 professionals in more than 150 countries earned the CISA certification. It is renowned as the globally recognized achievement for those who control, monitor and assess an organization's information technology and business systems.

Being a CISA Means You Have Proven Ability and Experience.

Résumés/CVs may list your experience and knowledge, but the CISA designation after your name *proves* it.

"The world of technology is ever-changing, and I need to know that my employees are prepared to face such challenges," stated Marios Damianides, CISA, CISM, Partner, Ernst and Young LLP, USA. "The CISA designation is an excellent indicator of proficiency in technology controls."

Prove your knowledge. Enhance your credibility. Earn the designation that employers and clients are looking for.

Being a CISA Means Career Advancement and Higher Pay.

Recent independent studies conducted by Foote Partners and *Certification Magazine* rate ISACA's CISA and CISM designations among the highest paying in the IT profession.

A current profile of CISAs demonstrates the increasing managerial influence and authority achieved by CISAs within their enterprises:

- More than 2,600 CISAs are now employed as the chief executive officer, chief financial officer, chief compliance officer or an equivalent executive position.
- More than 2,000 serve as chief audit executives, audit partners or audit heads.
- More than 5,700 serve as chief information officers, chief information security officers, security directors, security managers or consultants.
- More than 8,300 serve as audit directors, managers or consultants.
- More than 7,000 serve as IT directors, managers or consultants.
- Nearly 11,800 additional CISAs are currently employed in senior or managerial or consulting positions in IT auditing, risk or compliance.
